

**Schedule:** June 2014 to September 2015    **Location:** Town of Menasha

**Description:** Work on this contract consists of common excavation, embankment placement, concrete pavement, erosion control, wick drains, a storm water detention pond, two culvert extensions, a bridge extension, a bridge over the railroad, retaining walls, sign structures, traffic control, erosion control and all incidentals required to complete this work.

**September 21 to September 25:** Erosion control, clean up, landscaping, punch list items will be placed as applicable as this project is nearing completion.

**September 28 to October 2:** Erosion control, clean up, landscaping, punch list items will be placed as applicable as this project is nearing completion.

**Traffic Impacts:** Throughout the duration of the project, there will be various shoulder closures along I-41, US 10/WIS 441, and all applicable ramps to allow the contractor to work adjacent to these areas. There may also be outside I-41 lane closures as needed, either at night or during non-peak hours throughout the project. There will be various shoulder closures as the contractor is bringing in equipment and mobilizing for the work. The contractor will be working on the bridge over Lake Street, so please be aware of work at that location.
